THE REVIEW TEAM COMMENDS...

- 1 the role of the programmatic review process (recognised widely across groups of internal and external stakeholders) in taking a pivotal role in
- 2 the excellent communication between students and teaching staff and the explicit mutual learning phases as a result of that communication, the close
- 3 the cross-fertilisation of research and teaching, with particular reference to how research feeds into taught programmes right down to undergraduate
- 4 the quality enhancement through informal and formal processes of collecting feedback, responding to it, and monitoring results.
- 5 the array of activities undertaken by CELT to improve student learning, as evidenced by the MALT programme, which helps staff to improve their

THE REVIEW TEAM RECOMMENDS...

- 1 Given the effectiveness of the programmatic review process in providing a 360-degree view of the local and institutional level goals in each academic
- 2 a reconsideration of DkIT's framework for the governance of QA in light of how far it currently supports the objectives in its new strategic plan and
- 3 that the Institute leverage the success of research activities to increase its engagement with local industry.
- 4 prioritisation of the research needs of the local community and industry within the region, in line with the DkIT AMBITION.
- 5 that DkIT simplify the remaining policies and procedures, and streamline them in a logical and traceable scheme. The review team advises the
